

— A PROPOSAL IN 10 PAGES

AI automation that gives you **your** **time back.**

Real systems that handle the work you hate — built free for our first clients.

• Lead & inquiry handling

• 24/7 AI support

• Back-office automation

— WHO WE ARE

A young, AI-native studio building automations for European SMEs.

Aucta AI is led by **Yan** — 18, coding since 15, the last years deep in AI and automation. The studio exists for one reason: to bring the systems large companies pay six figures for to the small and mid-sized businesses that actually need them.

WHY YOUNG IS AN ADVANTAGE

We grew up native to these tools. No legacy stack to defend, no agency overhead to feed. We ship fast, listen closely, and stay hands-on the whole way. You talk directly to the person building your system.

WHO WE SERVE

Small and medium businesses across Europe — local services, e-commerce, agencies, clinics, SaaS. Anyone whose team is spending too many hours on work a machine should do.

THREE THINGS WE COMMIT TO

01 / PROVEN ONLY

No experiments on your business.

We only ship solutions we've already tested. Your operations are not a sandbox.

02 / ZERO DISRUPTION

We plug into your tools.

We don't replace the stack you've built. We extend it — quietly, in the background.

03 / MEASURED RESULTS

Hours saved, money earned.

Every project is judged on outcomes you can count on a single page — not features shipped.

40+

HOURS / MONTH FREED

FASTER LEAD RESPONSE

up to 80%

LOWER COST ON ROUTINE TASKS

— THE PROBLEM

You didn't start your business to do this work.

Most of the friction in a growing SME isn't strategy — it's repetition. Inbox triage, lead chasing, status updates, copy-pasting between tools. Useful, but invisible. Below: what we hear from owners almost every week.

“ I spend hours on repetitive work instead of growing the business.

“ Leads go cold while I sleep — I can't reply 24/7.

“ My data lives in five different tools that don't talk to each other.

“ Growing means hiring — and hiring is slow and expensive.

All of this gets solved — without replacing the systems you already use.

— WHAT WE BUILD · PART 1 OF 2

Eight automations, one promise: you stop doing the work the machine should.

01

AI chatbots

Answer customers instantly on web, WhatsApp and Instagram — in any language.

Customer a... → AI answers → You're not...

02

Lead funnel automation

Capture, qualify and book leads automatically — even at 3am.

New Lead → Auto-quali... → Booked

03

Smart email handling

Inbox sorted, replies drafted, threads routed to the right person.

Inbox in → Sort + dra... → Route

04

Call transcription & summaries

Every call becomes searchable notes and clear action items.

Call ends → Transcribe → Summary + ...

— WHAT WE BUILD • PART 2 OF 2

From your own documents to your CRM hygiene — automated, on a schedule.

05 RAG document assistant

A private assistant that answers from your own documents and policies.

Question → Search you... → Cited answ...

06 CRM automation

Records updated, follow-ups sent, pipeline kept honest — without manual work.

Activity → Update CRM → Follow-up

07 AI content machine

On-brand posts, emails and articles produced on a schedule you control.

Brief + br... → Generate → You approve

08 PDF / data extraction

Pull clean, structured data out of invoices, forms and contracts.

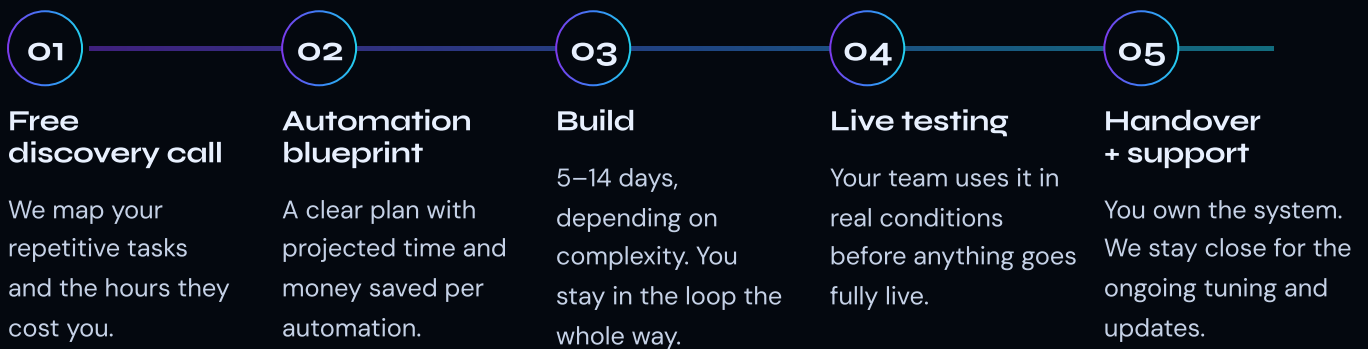

Document in → Extract fi... → To your sy...

Every automation above plugs into the tools you already use. We don't ask you to migrate. We don't ask you to learn a new platform. The system runs in the background — your team only sees the outcome.

— HOW WE WORK

Five steps from first call to a live, working system.

No upfront commitment. No disruption to your current operations. You can stop after any step and keep what we've already mapped out.

NO UPFRONT COMMITMENT

The discovery call and blueprint are free. You decide if the projected return is worth a build — not before.

NO DISRUPTION

Your team keeps working the way they work today. The automation runs alongside, not on top of.

— WHAT RESULTS LOOK LIKE

Industry scenarios & benchmarks — not named clients.

We are at the start. Instead of inventing case studies, we show you the kind of result these systems typically deliver in each industry, based on published benchmarks and the architecture we'd ship.

BUSINESS TYPE	CURRENT SITUATION	WHAT WE AUTOMATE	TYPICAL PROJECTED RESULT
Logistics startup	Manual ops coordination across drivers, clients, spreadsheets.	Workflow automation, status updates, dispatch handoffs.	~120 hrs / month potentially freed.
Clothing brand · e-commerce	Drowning in DMs and order questions.	AI support across IG & WhatsApp + order-status handling.	200+ messages/day handled; conversion can rise meaningfully.
SaaS company	Slow, manual onboarding draining support.	Automated onboarding flow, in-app guidance, ticket triage.	Onboarding days ↓; support tickets can drop ~60%.
Marketing agency	Content bottleneck, missed deadlines.	AI content machine on the agency's tone-of-voice.	Output multiplied; deadlines protected.
Private clinic	No-shows quietly killing revenue.	Automated reminders, rebooking, waiting-list flow.	No-shows can drop from ~25% toward single digits.

Figures are industry-based projections illustrating typical outcomes, not guarantees or named client results. Real numbers depend on your data, channels and starting baseline.

— TECH STACK

We use the same tools serious teams use — chosen for reliability, not novelty.

If you already use HubSpot, n8n, WhatsApp Business or Gmail, you're already in our stack. Below: the building blocks we reach for first.

AI MODELS

GPT-4o

Claude

Whisper

Reasoning, multilingual conversation and high-accuracy speech-to-text.

AUTOMATION

n8n

Make

Python

The plumbing that connects everything to everything — reliably and observably.

CRM

HubSpot

Pipedrive

Bitrix24

Native integrations with whatever pipeline you already track in.

COMMS

WhatsApp API

Instagram API

Gmail / Outlook API

Official APIs only — no scraping, no shadow accounts, no surprises.

Don't see your tool here? We integrate with most modern SaaS via official APIs and webhooks.

— PRICING

Free for our first clients. Standard rates after.

PILOT

FIRST CLIENTS

Free

Full automation built end-to-end, at no cost. You only invest your time.

- Discovery, blueprint, build, handover.
- One core automation, fully live.
- 30 days of tuning included.

STANDARD

from €500

Once the pilot phase ends. Single-system automations for SMEs.

- One production-grade automation.
- Integration with your stack.
- Standard support & updates.

ADVANCED

from €2,000

Multi-system builds, RAG, custom models, ongoing operation.

- Multiple automations orchestrated.
- Private data & RAG pipelines.
- Priority support & iteration.

Free for our first 3–5 clients. In exchange we ask only for honest feedback and — if you're happy — a testimonial and a referral. After that, pricing moves to standard market rates. No catch, no obligation.

- Only a few free spots remain.

— FINAL STEP

Let's build your first automation — free.

100% free for our first clients. No commitment. No risk. One call is enough to see whether it's a fit.

WHATSAPP
